

## Stainless Steel Tube Clips

### Technical Specifications Sheet

#### Simple and easy to use on LDPE pipe

These stainless steel tube clips are ideal for clamping LDPE pipe or drip tube to plastic barbed fittings. They suit all the popular LDPE pipe sizes [10, 16, 19, 25 and 32 mm] as well as all the common drip tube sizes.

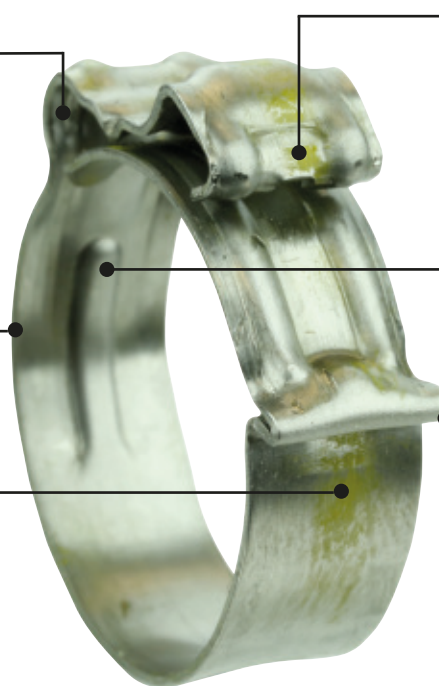

#### Compensation Loops

– The built-in compensation loop adjusts for the variation in the outside diameter of tubes. They also provide elasticity to remain tight as tubes expand and contract from the effects of temperature and pressure changes

**Rolled Edges** – The rolled edges of the clips protect tubes from pinching and potential damage

**Colour Coding** – The colour coding assists with identifying the different sizes and avoid mix-ups with installation

**Identification** – Each clip is clearly designated by a size code and a batch code to allow traceability

**Locking System** – The unique locking system ensures the clip is assembled and locked in position correctly every time. The result is no twisting or off centre assembly

**Even Clamping** – The internal design of the clip is such that it provides an even distribution force with no flat spots. This ensures a leak proof seal

**Material** – The clips are available as W4 [304 stainless steel] to resist corrosion and the effects of UV, and provide longer life

**Tool Options** – Installation is quick and simple and can be done by using a pair of pincers or the dedicated pliers

Product Code	Clamping Range	Colour Coding	Order Quantity	Product Code	Clamping Range	Colour Coding	Order Quantity
R86120100	12.5 - 14.0 mm	Black	100	R96210100	21.5 - 23.5 mm	Green	100
