

# Rural Tapping Saddle

## Technical Specifications Sheet

The Philmac range of Australian made rural tap-ping saddles provides the perfect solution to the problem of making an offtake from rural poly pipe. Installation could not be easier with only one pair of bolts needing to be tightened. The saddle is also specifically designed to ensure the bolts are held in place when being tightened.

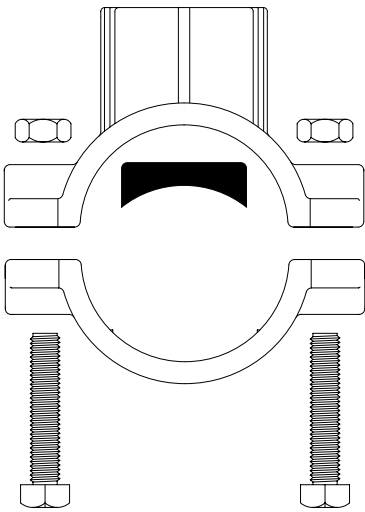

Philmac Rural tapping saddles are manufactured from high grade polypropylene to provide a high degree of resistance to corrosion, chemicals and sunlight. Available with either galv or SS316 nuts and bolts.

### Installation Instructions

1. Insert rubber seal into saddle top.
2. Insert bolts into saddle bottom and push bolt head into hex recess.
3. Assemble saddle halves in the desired location around rural poly pipe.
4. Engage each nut and then fully tighten until firm and saddle halves have met.
5. Drill hole in pipe for branch outlet.
6. Connect desired threaded fitting to branch outlet, using PTFE tape.

### Range

Product Number	Size	Standard Pack
90 8032 00	1" x 3/4"	1
90 8042 00	1 1/4" x 3/4"	1
90 8043 00	1 1/4" x 1"	1
90 8052 00	1 1/2" x 3/4"	1
90 8053 00	1 1/2" x 1"	1
90 8062 00	2" x 3/4"	1
90 8063 00	2" x 1"	1
Stainless Steel [304] Nut and Bolt Kits		
40 8046 00	[M8 x 40] x 2	1

### Features and Benefits

#### Tougher Than Ever

Philmac's new rural saddle is made from tough, impact-resistant polypropylene for extra durability and longer service life under harsh conditions.

#### Bolts are Best

The saddles still incorporate only one pair of bolts, a design proven through years of trouble-free performance. And now, the bolts are held firmly in position during installation. No frustration, just quick and easy assembly.

#### Sealing Power

A special rubber sealing ring fits easily into the body of the saddle and provides high tolerance to variations in pipe size or out-of-round pipe.

#### Largest Australian-Made Range

With a newly introduced size, Philmac saddles can now be used on 1" rural pipe. This makes them the largest range of rural saddles made in Australia.

#### No Twists

Philmac's anti-twist design resists rotation on the pipe – even when a riser is fitted.

#### Stainless Steel Option

For use under extreme conditions, a stainless steel nut and bolt option is available as an accessory.
